

Mission

The purpose of the Franklin County Recorder’s office is to serve as a central hub for all documents that pertain to real estate in the county by providing recordation services using the best practices available to efficiently intake, scan, review, and return documents for a volume that is necessary for Ohio’s most populous county. As chief administrator of the County Microfilming Board, the Recorder’s mission also includes the work of the Franklin County Document Imaging Center (DIC). The central purpose is to provide all county agencies with the means to store permanent records in a cost effective way that also provides the greatest protection for the preservation of these records.

Strategic Focus

Primary Initiative: Facilitate the recordation of documents - Facilitating the recordation of documents by efficiently providing intake, scanning, indexing and verification with an average turnaround time of one business day to be publicly viewable on the search website and ready to be returned to the filer within two business days.

Primary Issue: Recording and Filing - Real Estate Market Volatility - A burgeoning real estate market with overall growth in Central Ohio can create significant variations in volume for the Recorder’s office as the demand for real estate document recordings and title searches retrieval ebbs and flows with transactions of real property and new construction projects. These market fluctuations can present challenges in staffing and appropriately serving both the real estate professionals in addition to augmenting outreach and services to the general public. - To address this, our office provides continued training to staff and forecasts when demand for services will peak, increasing agility in response to the higher demand.

Performance Spotlight

Measure: Average Turnaround Time for Publicly Viewable Documents in Days

Program: Filing

About this measure		Why it is important	
This measure is calculated using metrics from the Recorder's document recording software "County Fusion". The calculation is based upon the intake date/time of daily recording activity until the date/time of completion and publicly viewable.		As the largest in the State, the Franklin County Recorder's office completes recordings of over 700 documents every business day, on average, with near 180,000 document recordings annually. Due to such a large demand for recording services, it is crucial that we validate our efficiency and time until a document is available online, for all those that use our services. Recording numbers have significantly increased over the past year and expect to continue.	
What is being done			
Turnaround time is monitored on a daily basis, and the completed recording date is being reported back to all individuals that are using our website to search for documents. It also provides management with the tools to address any bottlenecks that may have occurred in the recording process.

Vacancy Credit

The vacancy credit process is designed to more accurately reflect the true expenditures for Personal Services and Fringe Benefits within the agency budget request. The calculations for the budget process begin with funding all approved positions for the entire year. Vacancy credits take into account that not all approved positions will be filled for the entire year. The methodology historically used by OMB to estimate an agency's vacancy credit utilizes a four-year history of unused personnel budgets to estimate an appropriate vacancy credit. However, vacancy credits may vary from the four-year average due to staffing trends or the number of positions supported within a fund.

Chapter 317

Program Services:

Cashiering (Recording Services), electronic document management – including scanning, data entry, quality control, disposition, and customer service. Maintain records of veteran discharges and ID cards. Maintain records of living wills and health care powers of attorney.

Core Principle:

Provide Efficient, Responsive & Fiscally Sustainable Government Operations

Linkage to Core Principle:

Through the successful delivery of the program, real estate professionals and the public have access to permanent public records and associated resources for title searches, real estate transactions, and the general availability of locating and printing records. This helps to support the goals of 1) providing accountability, transparency and responsiveness to the public 2) providing quality customer service to industry and the public through efficient and effective internal services with streamlined workflows 3) providing efficient and quality centralized services to county agencies and other governmental entities using technology and best practices to maintain a low overhead and cost-effective production for recording, filing and retrieval of documents submitted in the most populous county in Ohio.

Sections 307.802 & 307.804

Program Services:

Document scanning (paper to electronic and microform), microfilm scanning (microfilm to electronic), COM service (electronic to microfilm), electronic document indexing, microfilm processing and duplication, microfilm equipment maintenance and archival microfilm storage.

Core Principle:

Provide Efficient, Responsive & Fiscally Sustainable Government Operations

Linkage to Core Principle:

Through the successful delivery of the program outputs and achievement of program outcomes, government agencies served, and ultimately the public served by those agencies benefit from access to permanent records, as well as centralized storage facilities for securing the documents for future generations at a cost-savings to the county and its agencies. This helps to support the goals of 1) providing accountability, transparency and responsiveness to the agencies that serve the public 2) providing long-range planning and organizational stability 3) providing efficient and quality centralized services to county agencies and other governmental entities 4) developing and enhancing collaborative partnerships and other best practices to improve service delivery and management of county resources.
