

Mission

Lead the planning, funding, and evaluation of community-based recovery-oriented mental health and addiction prevention, treatment, and support services for residents of Franklin County.

Strategic Focus

Primary Initiative: Service Delivery System - Coordinate a collaborative and equitable mental health and addiction services system which prioritizes access, innovation, and culturally responsive care to meet the needs of individuals and families in Franklin County.

Primary Issue: Franklin County Mental Health and Addiction Crisis Center and Crisis Care Continuum - Mental health and addiction crisis system capacity must be addressed to meet growing unmet need and demand for services. ADAMH is working with community partners to build a new mental health and addiction facility to serve as the central, preferred destination in Franklin County for behavioral health crisis needs. Set for ground-breaking in 2022 and completion in 2024, the center will provide a complete crisis care continuum for adults. Critical components of this continuum include a call center and mobile community response. - 1) Increase access to mental health and addiction crisis care to meet the needs of all Franklin County residents, including at-risk and socially disadvantaged populations; 2) Improve quality of crisis care by offering a spectrum of mental health and addiction services and direct links to community-based services; 3) Construct a facility that meets current and future demand; 4) Provide a facility that serves as a preferred destination for mental health and addiction crisis needs.

Performance Spotlight

Measure: Discharge Disposition: Percent of individuals presenting in crisis and admitted to an observation level of care who are discharged to home, community, and/or other lower level of care such as community-based mental health or substance use disorder treatment services.

Program: Crisis

About this measure		Why it is important	
This metric is measured by discharge information from crisis service providers about the clients who are discharged. The measure is the number of clients discharged to home or the community out of the number of total clients discharged from an observation level of care.		ADAMH strives to ensure access to high-quality behavioral health services for all Franklin County residents, including services provided in a crisis setting. The goal of these services is to stabilize the crisis and link the individual with the hospital or community-level treatment they need.	
What is being done			
The purpose of the Crisis Program is to develop and monitor services, provide crisis and acute behavioral healthcare and support to individuals in a clinically-appropriate, cost-effective, and timely manner, delivered in the least restrictive environment to avoid hospitalization or involvement with the criminal justice system. Data regarding the disposition of client discharges are gathered from service providers and monitored for improvement in the percent of individuals who are successfully discharged to home or the community with linkages to community-based care. These data inform ADAMH of the accessibility and quality of services as well as the strength of linkages arranged upon discharge. ADAMH also monitors services and information about persons with frequent presentations in crisis settings to ensure they receive the community supports needed. This measure aligns with the "Rise Together: A Blueprint for Reducing Poverty in Franklin County" Goal #9: "Reducing the overall incidence and racial disparities in occurrences of preventable diseases and trauma, and improving the health of those living with chronic, mental, physical, and behavioral health conditions among those struggling financially."

Budgeted FTE History

Vacancy Credit

The vacancy credit process is designed to more accurately reflect the true expenditures for Personal Services and Fringe Benefits within the agency budget request. The calculations for the budget process begin with funding all approved positions for the entire year. Vacancy credits take into account that not all approved positions will be filled for the entire year. The methodology historically used by OMB to estimate an agency's vacancy credit utilizes a four-year history of unused personnel budgets to estimate an appropriate vacancy credit. However, vacancy credits may vary from the four-year average due to staffing trends or the number of positions supported within a fund.

	2021 Budget	Four-year Average	2022 Recommended	% Point Change to:	
				PY Budget	Average
Levy Fund	6.0%	16.2%	6.4%	0.4%	-9.8%

The 2022 Vacancy Credit is 6.4%, which is lower than the four-year average but is higher than the 2021 Budget.

Request for Results

A Request for Results is a request for additional appropriations to support a new initiative or expand existing services. A Request for Results contains a detailed description of the new initiative, justification for why the increase in appropriations is necessary, and the expected outcomes. In addition to the amount of additional appropriations, a Request for Results should identify any new revenue or savings expected to be achieved from the new initiative. The Office of Management & Budget reviews each Request for Results to determine if adequate justification is provided and sufficient resources are available. The County Administrator makes a recommendation based on this review, with the Board of Commissioners making the final decision on whether the item is included in the budget.

Director, Policy & Legislative Affairs		
Fund Type	Amount Requested	Amount Recommended
Non-General Fund	\$142,526	\$142,526
Recommended	Request Description: The agency is requesting a Director, Policy & Legislative Affairs (annual salary of \$97,900) to develop the ADAMH policy agenda as informed by ADAMH stakeholders and community partners, monitor and analyze relevant policy issues, advocate for the ADAMH Board on legislative affairs and engage, deepen, and manage partnerships to support strategic planning to reduce stigma around mental health recovery services with diverse populations. The 2020 Community Needs Assessment highlighted the need to expand advocacy as a strategic goal. ADAMH had previously utilized lobbying services provided by the Ohio Association of ADAMH Boards but the association disbanded in 2020.	
	Recommendation: The 2022 Budget includes the Director, Legislative & Policy Affairs position because it will allow ADAMH to continue its efforts to expand advocacy and build partnerships now that it can no longer utilize the services of its association.	

Enterprise System Analyst FTE		
Fund Type	Amount Requested	Amount Recommended
Non-General Fund	\$96,950	\$96,950
Recommended	Request Description: This agency is requesting an Enterprise System Analyst (ESA) position (annual salary of \$60,342) to manage the new enterprise system and support key functions related to member enrollment, provider billing relations, and claim payment processing. The ESA will determine member eligibility for coverage of services rendered by contract providers, ensure correct claim submission by provider agencies, and provide support for system set up, configuration, processing and troubleshooting of the enterprise solution. The ESA will also provide technical assistance and monitor claims and enrollment functions while contributing to cross functional business processes with other internal ADAMH business units.	
	Recommendation: The Enterprise System Analyst position is included in the 2022 because it will allow ADAMH to manage provider billing and claims processing in a timely, accurate, and efficient manner.	

Levy Plan Comparison

The Human Services Levy Review Committee (HSLRC) evaluates levy requests to assure that levy funded agencies have demonstrated prudent programmatic and financial planning. In developing the levy fiscal plan, the HSLRC recommends that the ending cash balance equal at least three months of expenditures at the end of the levy cycle. Each year as a part of the budget process, the Office of Management & Budget compares current year revenue and expenditure projections and budget to the HSLRC levy plan to determine if the agency is on track to end its current cycle with the recommended cash balance.

Funding for the Crisis Center was not included in the HSLRC projections; therefore, the Levy Plan Comparison does not include the Crisis Center Fund. Social Services expenditures are higher than anticipated largely because ADAMH is receiving a higher amount of state and federal pass through funds, which can be difficult to predict because they can vary significantly from year to year.
