

Mission

The mission of the Franklin County Office of Justice Policy & Programs (OJPP) is to provide system-wide comprehensive justice planning and oversight, identify training and technical assistance needs and direct the efficient and effective application of Federal, state and local funds toward developing and sustaining projects and programs that support smart justice, encourage diversity, equity and inclusion and deliver quality services to the Franklin County community to enhance their health, safety, and welfare in the context of the criminal justice system.

Strategic Focus

Primary Initiative: Office of Justice Policy and Programs Reentry Services - By December 31, 2023 a minimum of 200 individuals identified as at risk for an opioid use disorder will receive medication assisted treatment pre-release and develop a recovery plan prior to their release from jail. OJPP will distribute a minimum of 1000 naloxone kits to justice involved individuals at risk for an opioid related overdose. The Rapid Resource Center co-located at the Franklin County Corrections Center II will be staffed and operational 24/7 and the Rapid Resource Center co-located at the new Fisher Road Correctional Center will be open and operating. Over 2000 justice involved residents and/or their family members will have received services through the Rapid Resource Center. The Safer Stations program will have linked 300 individuals directly to detox and/or residential treatment.

Primary Issue: Reentry - Pervasive barriers preventing successful re-integration of justice involved residents returning to Franklin County from local or state incarceration. Barriers include lack of affordable and accessible housing, substance abuse and mental health treatment and unemployment/under-employment. Failing to adequately address the reentry needs of ex-offenders will likely lead to jeopardized public safety outcomes, higher unemployment and poverty rates, increased addiction and overdoses, homelessness and mental health decompensation, and intergenerational cycles of criminal justice involvement disproportionately affecting African American communities. - The Franklin County Criminal Justice Planning Board and the Franklin County Reentry Advisory Board will adopt action steps that minimize barriers to successful reintegration efforts and reduce the overrepresentation of individuals with serious mental illness in the Franklin Co Jail.

Performance Spotlight

Measure: Increased number of individuals identified with a history of substance dependence and linked to treatment services as a result of an OJPP initiative.

Program: Stepping Up/Reentry Initiative

About this measure		Why it is important	
This measure tracks the number of individuals receiving medication assisted treatment prior to release from jail.		The Franklin County Coroner’s Office confirmed 825 overdose-related deaths in 2021, a slight decrease from the previous year yet a 48% increase compared to 2019.	
What is being done			
Increased access to medication assisted treatment pre and post release. Increased harm reduction education opportunities and distribution of naloxone kits. Linkage of at-risk individuals to treatment, peer support and other supportive services.

Vacancy Credit

The vacancy credit process is designed to more accurately reflect the true expenditures for Personal Services and Fringe Benefits within the agency budget request. The calculations for the budget process begin with funding all approved positions for the entire year. Vacancy credits take into account that not all approved positions will be filled for the entire year. The methodology historically used by OMB to estimate an agency’s vacancy credit utilizes a four-year history of unused personnel budgets to estimate an appropriate vacancy credit. However, vacancy credits may vary from the four-year average due to staffing trends or the number of positions supported within a fund.

Request for Results

A Request for Results is a request for additional appropriations to support a new initiative or expand existing services. A Request for Results contains a detailed description of the new initiative, justification for why the increase in appropriations is necessary, and the expected outcomes. In addition to the amount of additional appropriations, a Request for Results should identify any new revenue or savings expected to be achieved from the new initiative. The Office of Management & Budget reviews each Request for Results to determine if adequate justification is provided and sufficient resources are available. The County Administrator makes a recommendation based on this review, with the Board of Commissioners making the final decision on whether the item is included in the budget.

- CASA Operations

Core Principle and Linkage

Provide Community Safety, Security & Effective Justice

CASA of Franklin County links to this core principle by training community volunteers to become Guardians ad Litem (GALs), who then advocate in court for the best interests of abused and neglected children. Through consistent visits with the child, CASA volunteers get to know the child’s circumstances and wishes well enough to make fact -based recommendations to the Juvenile Court about custody, placement, visitation and services. GALs gather information by making monthly visits with the child, interviewing important figures in the child’s life, attending meetings about the child’s welfare, writing monthly reports and appearing in court as the child’s advocate. According to data acquired by National CASA, foster children who have a Court Appointed Special Advocate are more likely to find a safe and stable permanent home, are more likely to succeed in school and are less likely to re-enter the foster care system. CASA of Franklin County is the only organization in Franklin County that provides volunteer GALs.
